## Property Description

Absolutely beautiful centrally located home in Uvita. When one thinks of a garden paradise this is what you envisioned. As you enter the hand painted electric gates you notice right away not one detail has been missed. To the left you notice a very large yard that has been professionally landscaped with one of the areas finest creative landscape artists. The new covered rancho is conveniently located with a built in Napoleon grill, mini fridge, wet bar and a live edge artisan table with wicker lights for the touch one expects for the best dining experience. The kidney shaped pool, also recently added, is the center piece to this wonderful entertainment space. Near the rear of the property you will note a covered patio bed and as you meander toward the home another covered Rancho hosts a high end wicker sectional couch for outdoor get togethers that one expects in Costa Rica. So many tropical plants are seen from every corner of this property.
