Property Description

Senderos Product Development worked with the Inverse architectural team to create a home that lines up east to west and creates amazing privacy and view corridors. The volumes of the house are built running North-South, creating long beautiful spaces. It's like the house is designed on an axis... hence the name "Axis House". "The remarkable thing about this house is the ability to draw a line with the complete arc of the sun. We took the opportunity of this peak location to orient the rooms in key places on an East-West axis. For instance, in the Master we see both the sunrise and the sunset. Building off these east-west lines, the house extends in linear paths to the north and south creating generous, long public spaces to take in the view while entertaining or just relaxing. It will be a very unique and special experience to occupy this home."
