Property Description

A rare opportunity to acquire an extraordinary 1066 Hectares / 2,634 acres (776 titled + 290 with only possession rights, to be titled) property in Costa Rica's Southern Pacific Zone, in the world-famous Osa region, between Sierpe and Drake Bay. This massive estate features an exceptional combination of lush tropical forest, rolling hills, rivers, waterfalls, natural springs, and panoramic viewpoints—making it ideal for a large-scale private estate, eco-luxury development, tourism project, or long-term land investment. One of the property's most impressive features is its breathtaking visibility over the region. From key elevated points, enjoy spectacular panoramic views stretching across the Pacific Ocean, Golfo Dulce, Caño Island, and the vast Terraba-Sierpe mangrove forest, considered one of the most important mangrove ecosystems in Latin America. The land also includes access to the Río Sierpe, opening the possibility to build a private riverside deck or dock area, creating a unique connection to one of Costa Rica's most iconic river systems.
